## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 2-4 are objected to because of the following informalities:

Claim 2: the term "said swab" in line 1 has no antecedent basis. This should be changed to "spongy elongated material" which is recited in claim 1.

Claims 3 and 4: the preamble "*a body piercing cleaning and treatment system*" is different than the preamble of the independent claim. The preamble should be changed to "a piercing hygiene system."

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 4,497,402 to Karos.

Karos discloses a hygienic device in Figures 1 and 2 that meets all of the claim limitations. The device includes a pointed end (16) fixed to a spongy elongated material (14). Karos describes the string (14) as absorbent and saturated with an antiseptic fluid, or "antimicrobial" substance (column 2, lines 59-61). The string (14) clearly has a bent shape in the package and is capable of assuming many different shapes since it is flexible.

Art Unit: 3731

**Conclusion**

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 5,183,461 (Hobbs) and US 6,595,939 (Waters) disclose devices for cleaning pierced tissue similar to the claimed invention.
